Piyush Saini

Full-Stack Software Developer | DevOps Tools | AI

piyushsaini9098@gmail.com 9098678093 Piyush Saini | LinkedIn

PROFESSIONAL SUMMARY

Full-Stack Software Developer with 2+ years of professional experience in designing, developing, and deploying web applications integrated with cloud and AI services. Experienced in delivering 4+ end-to-end projects across the complete software development lifecycle, from requirement analysis and backend development to deployment and maintenance.
Proficient in React.js, Next.js, Node.js, Express.js, RESTful API development, and database technologies including MySQL, MongoDB, PostgreSQL, and Redis. Hands-on experience implementing secure authentication and authorization using JWT, OAuth 2.0, and AWS Cognito, along with integrating third-party services such as Google APIs and AI-powered APIs.
Skilled in AWS cloud services, Docker, Git, GitHub Actions, CI/CD pipelines, and DevOps practices for application deployment, automation, and monitoring. Experienced working in Agile teams, writing clean and maintainable code, troubleshooting production issues, and delivering reliable, scalable software solutions.

TECHNICAL SKILLS

Frontend
HTML, CSS, JavaScript, TypeScript, React.js, Next.js, Redux, Redux Toolkit, Zustand, Context API, GraphQL.

Database
MySQL, MongoDB, PostgreSQL

Testing & Tools
Postman, Jest, Jira, Agile/SCRUM, SDLC, System Design.

Design, Styling, & UX
Tailwind CSS, Material UI, Bootstrap, AntDesign, Figma, Responsive Design.

Backend
Node.js, Express.js, REST APIs, JWT, OAuth2, RabbitMQ, Apache Kafka, Redis, Sequelize, Microservices, Swagger (API Testing).

DevOps & Cloud
AWS (EC2, S3, IAM, RDS, SQS, SNS, Autoscaling, CloudWatch), Docker, Git, GitHub Actions, CI/CD Pipelines.

AI & Integrations
Generative AI, Agentic AI, Prompt Engineering, RAG (Retrieval Augmented Generation), AI API Integrations, Chatbot Development, Google APIs, AI Coding Tools (Cursor, GitHub Copilot, OpenAI Codex).

Payment Gateways
Razorpay

PROFESSIONAL EXPERIENCE

Full-Stack Software Developer 06/2024 – Present
Micro Technologies

- Designed, developed, and deployed full-stack web applications using the **MERN Stack**.
- Built dynamic and responsive user interfaces using **React.js**, **Redux**, **Next.js**, and seamless API integration.
- Improved frontend performance using **lazy loading**, **memoization**, and **code splitting**.
- Designed and developed scalable **RESTful APIs** using **Node.js** and **Express.js**.
- Designed **software architecture** for scalable and maintainable applications.
- Applied **System Design** principles to build reliable and high-performance applications.
- Implemented **Clean Architecture** for modular and maintainable code.
- Applied **Software Design Patterns** to improve code reusability and maintainability.
- Developed **Microservices** to build modular and scalable backend systems.
- Optimized **database design**, schema, indexing, SQL queries, and **Redis caching** for improved performance.
- Developed concurrent backend services using **Node.js Event Loop**, **Async/Await**, and **Promises**.
- Implemented secure authentication and authorization using **JWT**, **OAuth 2.0**, **AWS Cognito**, and **RBAC**.
- Applied **software security** best practices including input validation, secure API design, authorization, and error handling.
- Integrated **Google APIs**, **AI-powered APIs**, and third-party services.
- Leveraged **AWS Cloud Services (EC2, S3, IAM, RDS, SQS, SNS, Auto Scaling, CloudWatch)** for deployment, storage, monitoring, and infrastructure management.
- Containerized applications using **Docker** and automated deployments with **GitHub Actions** and **CI/CD pipelines**.
- Improved application **scalability**, performance, and reliability through backend optimization and cloud-native deployment strategies.
- Followed **Agile** and **SDLC** best practices, participated in sprint planning, code reviews, and production support.

PROJECTS

SustaNetSystem | SDG Tracker
Built SDG monitoring dashboards using real-time global development data with interactive visualizations and a scalable MySQL backend.
Developed a food donation feature to connect NGOs with people willing to donate surplus food, addressing hunger and poverty.

Tech Stack: React, Node.js, Express, MySQL, AWS S3, Firebase.

ThinkLoop | EdTech Platform
Built a multi-role platform with admin, instructor, and student dashboards for course management and progress tracking. Students can browse and purchase courses via secure Razorpay integration, then enroll to access course materials. Integrated Razorpay for secure payments and optimized REST APIs for performance.
Tech Stack: Next, Node.js, Express, MongoDB, Tailwind CSS, AWS S3, Firebase, Postman, Web-socket.io.

MedStream | Integrated Healthcare System
Developed a role-based access system (RBAC) for Admins, Doctors, and Patients, enhancing data security. Integrated AWS S3 for secure record storage, ensuring high availability and data security while optimizing storage costs.
Tech Stack: React.js, Node.js, Express.js, AWS S3 bucket, PostgreSQL, REST API.

HomeSphere | Integrated Real Estate Management System
Developed a property listing and inquiry platform with real-time inquiry using MySQL. Enabled sellers to list properties for sale and buyers to browse, and make purchases directly through the platform. Implemented role-based dashboards and Razorpay payment integration.
Tech Stack: React, Node.js, Express, MySQL, AWS S3, Razorpay.

EDUCATION

B.Tech in Computer Science & Engineering Bhopal
Rajiv Gandhi Proudyogiki Vishwavidyalaya
